

92Pcs Single / Double Plastic Gear Motor Rack Pulley Gearbox Model Toy Car Auto Craft DIY Accessories Four-wheel Drive Robot Kit

Product Introduction:

- 1.Modulus:0.5M
- 2.Hole Diameter:0.8,1,1.9,2.05,2.55,3
- 3.Material:POM plastic

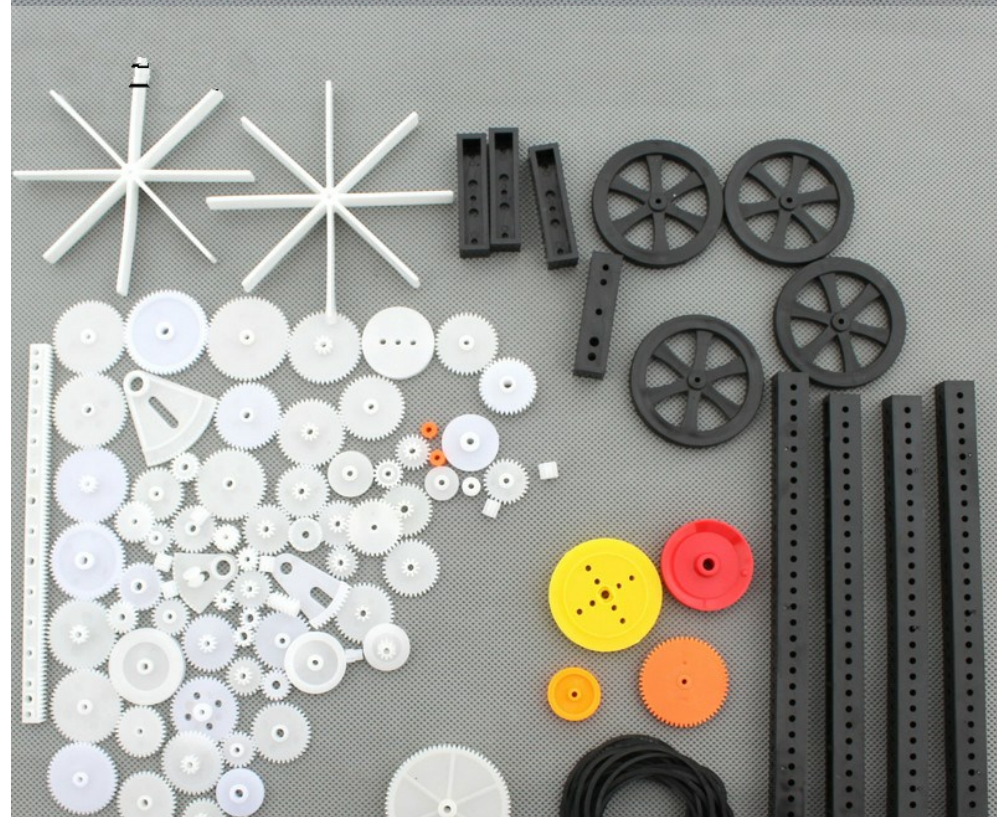

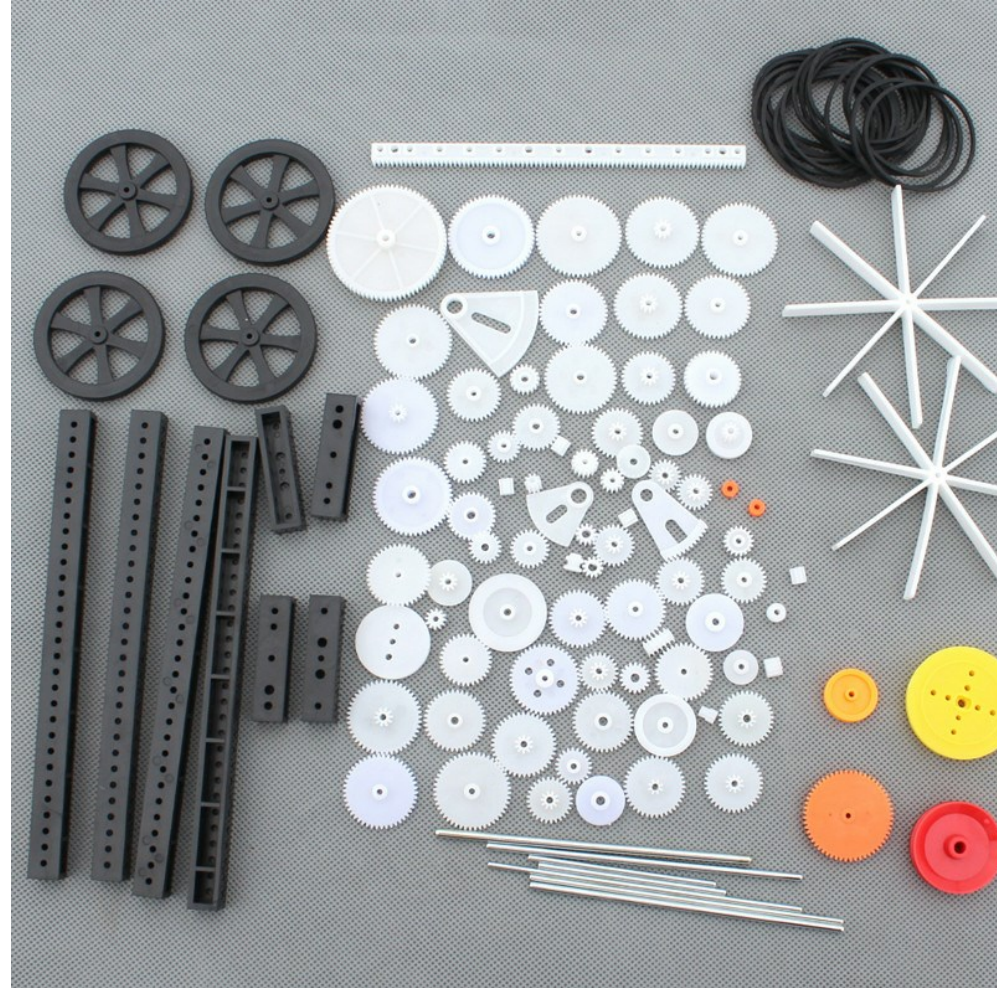

>> DIY knowledge guide

(1) gear diameter calculation formula: gear outer diameter (tooth top circle) = (number of teeth +2) * modulus

(2) If it is 2mm axis, with tight gear, please choose 1.9mm hole gear;

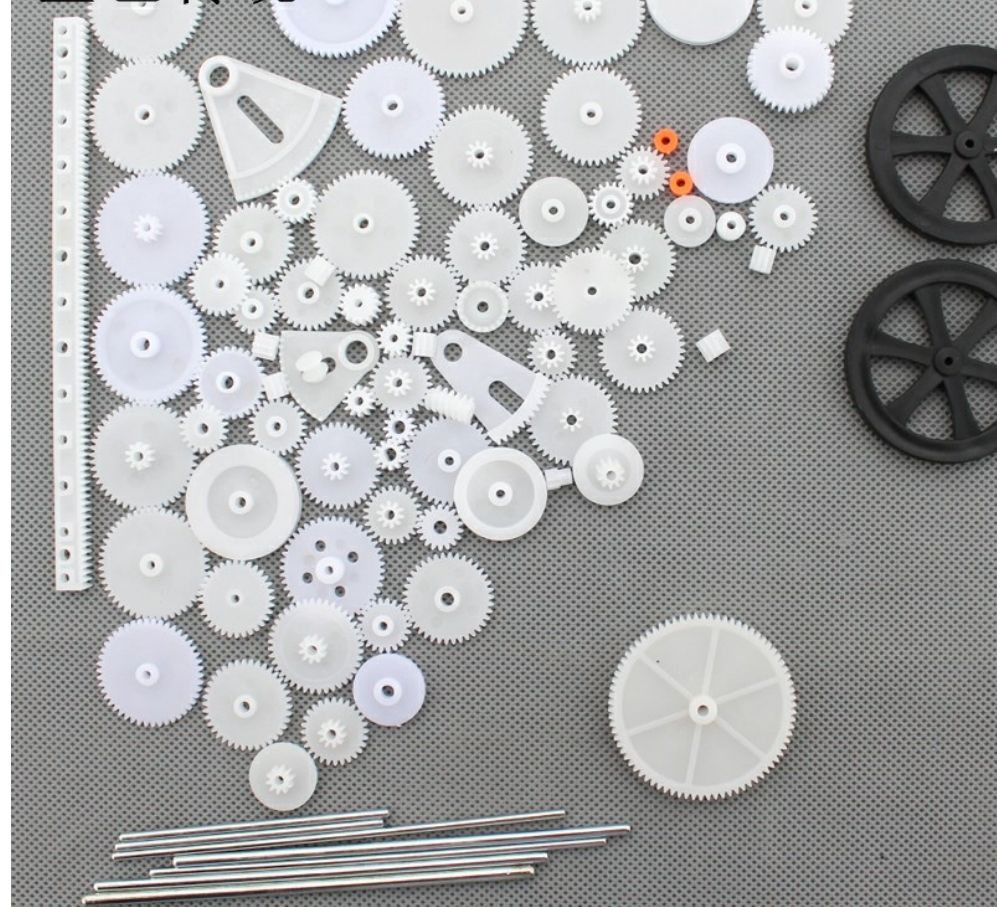

With the loose gear, that is free to slide, please select the 2.05mm hole gear;

In other words, tightly selected with a small 0.1mm hole gear, loose with a large selection of 0.05mm gear
